Introduction

Woosong University is a specialized university, providing curricula based on practice and theory. The University is ranked as an autonomous, top-tier university by the Korean Ministry of Education. We currently boast more than ten international programs offered entirely in English. Since the establishment of the University in 1995, Woosong has signed more than 400 Memorandums of Understanding (MOU) with universities and institutions in more than 60 countries. Collaborative programs include joint research, dual degree, student exchange, and study abroad, among other applications.

Woosong belongs to a larger group of education institutions under the Woosong Educational Foundation, including Woosong University, Woosong Information College, Woosong Language Institute, Seodaejeon High School, Woosong High School, Woosong Middle School, and several other institutions.

Our University currently boasts three international schools: SolBridge International School of Business, Endicott College of International Studies, and JW Kim College of Future Studies. The University also has an additional four schools/colleges including College of Railroad Transportation, College of Digital Media, College of Hotel and Culinary Arts, and College of Health & Welfare.

Woosong University is the university of choice for overseas students due to our large international student body, extensive international faculty, and delivery of programs, which are both theoretical and practical. All of our programs prepare students for rapid employment upon graduation.

Business Administration (AACSB Accredited) SolBridge International School of Business

Nurturing the Next Generation of Global Business Leaders and Entrepreneurs with an Asian Perspective

- relationships
- Participation in internships with leading-edge technological businesses • A global perspective in teaching and research in the most dynamic arena of the world
- economy

The BBA program is in our SolBridge International School of Business (AACSB accredited) and is a practical and international program designed to help students develop the fundamental business and management skills needed to kick-start their careers. BBA students build academic foundations for developing a successful career by learning key business concepts in their first and second years. In their third and fourth years, students can pursue one of five specializations (Finance, Management and Entrepreneurship, Marketing, Technology and Innovation, or Data Analytics) or complete a non-specialized general BBA degree. They also can pursue a minor in a foreign language (Korean, Chinese, or Japanese). Students are provided co-curricular opportunities to practice their acquired knowledge and engage in industry-related activities for a smooth and efficient transition into their careers.

Students gain a further competitive edge through our Global Challenge Program, where all students take part in an exchange program, an internship, or a capstone project. The BBA program is designed to help discover and develop the career goals of each of our students. Students may choose one of the five Career Tracks where they are presented with opportunities and activities directly relevant to their area of interest and meet Track Advisors who provide counseling tailored to their career goals and individual needs. Our BBA program graduates can be found in diverse industries, including banking, financial management, marketing, entrepreneurship, accounting, and general management.

Career Prospects

Graduates have pursued an international career in various industries in Korea as well as overseas. Below are some of the careers our alumni have pursued.

- Program Manager
- Financial Analyst
- Blockchain Specialist
- Procurement Specialist
- Financial and Tax Consultant
- Expat Recruitment Coordinator
- International Marketing Consultant
- Business Development Manager

At the end of the first year, students can choose one of the five Career Tracks below, receiving support from faculty advisors dedicated to each track.

		SolBridge BBA C

Global Management Cultivating Global Leaders in International Business for Industry 4.0

Understanding international business in the era of Industry 4.0 requires new knowledge of emerging practices & theory. Our program prepares competent, knowledgeable leaders to excel in meeting tomorrow's challenges.

Our Global Management program provides a broad education in the global business world to ensure competency in the variety of responsibilities and tasks that new graduates require. Our program looks to cultivate experts for the New Southern Region, which is emerging as a new growth engine for the world economy. We provide practical training courses to give students a sense of what it's like in the field; such as ASEAN business practices, international relations, and business practices curriculums developed with local mid-sized companies.

As the world grows smaller and technology becomes an ever-present part of our daily lives, new graduates must become proficient in digital technologies and global diversity. For this reason, students in Global Management learn programming languages, foreign languages, international management, and subjects related to international relations, ASEAN business practices, and interactions with local, mid-sized businesses.

Our program focuses on providing students with the knowledge and skills necessary to work in an international environment. Our overseas internship program creates opportunities for students to experience first-hand the importance of what they have learned. This program is taught entirely in English by international faculty members who have enjoyed successful careers in their respective fields.

Global Management ensures students are able to lead, manage, and execute, as well as develop, implement, and communicate cutting-edge ideas and creative solutions. The convergence of the skills they develop gives them the best possible preparation to work anywhere around the world.

Human and Digital Interface (HADI)

Cultivating Future Leaders Focusing on Artificial Intelligence · Cognitive Science · Data Science

Innovative programs to enable flexible learning in diverse environments which transcend learning boundaries to develop future industry leaders!

The Human and Digital Interface program transcends the boundaries of the traditional academic experience in terms of both location and curriculum. Students study in multinational campuses and gain the knowledge and practical experience necessary for success in the tech-driven industries of the future. Using an on/off-line hybrid learning platform, students learn as an international team, applying their technological skills and knowledge to find solutions to real-world problems.

With the utilization of online learning technology, students can learn not only from Woosong professors but also from leading faculty and industry experts from around the world. Our program provides Minerva-type virtual classes in three areas of specialization: Artificial Intelligence, Cognitive Science, and Data Science.

Our Artificial Intelligence specialization provides the tools for understanding and applying AI technology to the industries of the future. Al is radically changing both our economies and our societies, in much the same way as the invention of electricity did. In short, AI is quickly becoming the language of the future. People who can understand and use this technology will become the leaders most sought after in the fields of both business and science.

Our Cognitive Science specialization aims to provide essential, in-depth knowledge for understanding the human mind and its interactions with modern technology. As technology becomes ever more integrated into our daily lives, it becomes vital to understand how humans interact with technology, and, conversely, how to design technology that interoperates intuitively with humans. Cognitive science gives leaders and engineers the tools to do just that.

Our Data Science specialization is designed for visionary leaders who want to harness the incredible power of data. In every area of business and society, we are seeing an exponential increase in the data that we generate. The industries of the future will be built by leaders and engineers who can effectively understand and mine this data so as to better serve the customer, to better develop new products, and to better optimize the business process.

AI and Big Data Bringing Clarity & Understanding of Modern Technology

Our program brings clarity and understanding of Artificial Intelligence, Big Data Analytics and Industry 4.0. Teaching students to apply the knowledge gained for successful job placement is our ultimate goal. Don't be left behind, join our program today.

As the world continues to get smaller, the need for technology-based jobs has increased exponentially. Our AI and Big Data program boasts a curriculum that provides a solid foundation for current technological developments and beyond in the everchanging world of technology. Our AI and Big Data program provides students with the knowledge and skills necessary for a deep understanding of the latest and most innovative technologies, with a specific emphasis on Industry 4.0.

Students will be fully versed in the analysis, design, and implementation of today's most current advanced technological knowledge to prepare them for the intense job market.

Our AI and Big Data program is one of the only all English IT programs within Korea. Being located in one of the most advanced IT countries in the world gives students the opportunity to develop and enhance their understanding and knowledge. Industry partnerships strengthen your chances to gain employment after graduation by providing opportunities for real-world experience. With our new 4LAB Research Institute, students will participate in progressive research, focused on Data Science and Artificial Intelligence. All of these opportunities give graduates a competitive edge when they enter the job market after graduation.

Skills Learned

- An understanding of computer hardware & software
- Critical thinking in problem-solving
- · Relevant programming in a variety of languages
- · Create/maintain a web and mobile app programming system solution

- algorithms
- Proficiency with statistical analysis and data management
- Utilization of professional statistical software for business-related data analysis • Application of data science concepts/methods to solve problems in real-world contexts and communicate solutions effectively
- Curriculum focuses on applications of AI and big data analytics on top of SW and IT foundations Project based learning through project participation opportunity in 4LAB research center • Government authorized SW colleges

- International faculty with specializations in AI, big data analytics, and Industry 4.0
- Korea's advanced IT gives extraordinary chance to study modern applications and tech
- Software developer
- Web developer
- Computer programmer
- IOS/Android developer • IOT architect

Hotel Management Educating Hotel Management Leaders with International **Practical Experience**

As the world shrinks and the hotel and tourism industries boom, a career in Hotel Management should be your priority!

The Hotel Industry has always been an industry that relies heavily on the interactions that take place between its employees and its guests. Today, well-trained hospitality professionals are in demand more than ever, especially in the Asia Pacific Region, where many areas are developing into new and exciting tourist destinations. Our Hotel Management program molds students that are passionate about the industry into highly skilled professionals.

Unlike other programs in Korea, our curriculum focuses on an American-European style of education, taught 100% in English. To provide top-quality management education, we have benchmarked our programs against prestigious hospitality and tourism universities around the world. While some of these programs focus on base-level skills required for entry-level positions, others concentrate on providing their students with conceptual management skills needed later in their careers. Our program is uniquely designed to equip students with both the skills necessary to quickly find employment while still providing them with the foundation they will need later in their careers.

Our partnerships with industry greats like the Hilton Group, the Hyatt Group, and Sheraton Hotel and Resorts, which combined with our unique curriculum gives graduates a competitive edge when working in luxury hotels, on cruise ships, or in the meetings and events industry (MICE). Intern in countries like Saipan, China, Guam, Portugal, or Australia and create opportunities for employment after graduation. These industry leaders hold our alumni in high regard due to their ability to comfortably interact with both guests and employees from around the world. This ability is a direct result of the multi-cultural nature of our campus environment. Students have the opportunity to work with classmates that have diverse backgrounds and must learn to cooperate to achieve their goals.

Learning Outcomes

Program Highlights:

- Collaborate with multinational teams on various projects
- Operationalize specific international industry standards
- Recognize differences regarding regional industry practices
- · Identify and adhere to the cultural norms of various regions
- · Gain practical experience through classroom training and internships

- A program that utilizes an American/European approach to higher education • A multicultural environment that helps students learn to form relationships with people from diverse backgrounds
- A wide variety of job placement opportunities in South Korea as well as internationally with well established brands
- . Training from industry professionals that understand the real-world challenges that you will face in this dynamic industry
- · Guest speakers from both partner schools around the world, as well as industry

Global Culinary Arts Asia's Most Recognized Program in Culinary Arts

Creating great cuisine is more than intuition or a gut feeling. Aspiring to be a great chef requires knowledge learned from experts who can teach you to be the best you can be. Join us! Our program is rated the best in Korea - maybe, the best in Asia!

We believe that all good Chefs should be able to cook a variety of cuisines, so we have created a comprehensive culinary program that combines the best of European and Asian cooking with hands-on skills development. The skills you acquire in our Global Culinary Arts program lay the groundwork for your future as a Michelin star chef.

You will work with leading culinary brands from countries like France, Germany, Switzerland, Hong Kong, Singapore, and the Emirates. Our diverse international faculty teach and give you hands-on experience in our state-of-the-art kitchens and classrooms. Inside the kitchen and classrooms, you will have access to modern, cutting-edge culinary applications found at fivestar hotels and in top-class foodservice operations all around the world.

Our curriculum is presented entirely in English and prepares students for employment and leadership in the culinary industry with invaluable practical experience. Our students learn about more than food preparation; they also study business operations, restaurant management, wine and spirits, communications, and customer service so you can one day operate your own kitchen or restaurant. Students can also earn certifications in several specialized industry programs. Qualified students may participate in a practical six-month incubation experience in our on-campus premier Staricco Café.

Our million-dollar, state-of-the-art kitchens are unlike any other facility in the region. Students in our Culinary Arts program are eligible to transfer to our Institut Paul Bocuse program, one of the world's leading Culinary Arts Management Schools, in the Spring after they have completed one full year of study.

Restaurant & Entrepreneurship Developing Successful Future Restaurant Entrepreneurs

Join us to Collaborate, Make an Impact, and Empower Yourself. The possibilities are endless!

Skills Learned

The food and beverage business has exploded in recent years, giving rise to opportunities for those who have the right training and ambition. The Global Restaurant and Entrepreneurship program provides a unique combination of food & beverage service, business, and social entrepreneurship. We prepare students to access the continually growing industry by mastering the technical foundations of the culinary field while developing essential leadership and managerial skills in areas such as marketing, branding, finance, innovation, and development.

Our curriculum is rooted in a global perspective where you will develop confidence in your ability to manage business finances and learn critical operational functions like menu design, income statement analysis, pricing, margin analysis, supply chain management, guest service processes, and employee engagement and performance. You will hone your culinary expertise in practical classes where we have industry-standard equipment. The Restaurant & Entrepreneurship program gives best practices knowledge and the all-important ability to adapt to a changing environment.

Challenging projects and conversations with industry experts, entrepreneurs, and financiers will give you the insight and confidence to kick-start your own project and define the future of the food and beverage industry. Our university and industry partnerships around the world give you access to experiences that are invaluable to you as you begin to enter the job market.

Graduates are prepared for the diverse opportunities in the food and beverage industry. They will understand the concepts, strategies, and practical skills necessary for managing or even owning & operating a food business; such as food trucks, quickservice eateries, upscale restaurants, coffee bars, beverage establishments, or virtual service ventures.

Media & Communication Arts Creating the Korean Wave in Media and Communication Arts

The Korean world of Digital Media and Broadcasting is fast-paced and exciting. We invite you to join us and take part in this rapidly evolving and dynamic digital media industry.

Korea has established a global reputation with the Korean Wave (Hallyu), music, TV dramas, movies, and the exportation of its cultural economy, including K-pop. The Korean world of Digital Media and Broadcasting is fast-paced and exciting. We invite you to join us and take part in this rapidly evolving and dynamic digital media industry.

In our Media and Communication Arts program, you will learn the fundamentals and apply your skills to work within the broadcast, film, and entertainment industries. With access to professional quality equipment, our students bring their stories to life. Our faculty have professional credentials to support the development of your creative ideas. After completion of our program, you will be uniquely qualified in multi-platform media for today's online, always-connected world.

Our curriculum has an even balance of theory and practical experience that prepares you for employment globally. You will get to show your passion, creativity, and unique vision to direct and produce fresh media content that serves the artistic, cultural, educational, and informational needs of the community. Since our program is taught entirely in English, you will be able to be employed and work all over the globe.

Graduates will be ready for careers in broadcasting, film, and online media and be prepared to work in the ever-expanding global media and cultural industries. Students will bring a unique skill set to companies as quality professionals with an understanding of the "Korean Wave."

Learning Outcomes

K-Beauty Design Fostering Total Beauty Industry Experts with Special Knowledge of Korean Beauty

Korea is setting beauty standards around the world. Our goal is to educate graduates who are motivated and ready to take K-Beauty to the world.

Learning Outcomes

- Knowledge of foreign cosmetic brands
- K-Beauty Entrepreneurship Skills

Makeup Artist

With the Korean Wave becoming more prominent throughout the world, K-Beauty is growing into one of the most exciting new areas in beauty design. Master Korean professional techniques and cosmetics to pursue a promising career in Beauty Design with a specialization in K-Beauty.

Our K-Beauty Design program is taught entirely in English and looks to foster total beauty industry experts by implementing theoretical, practical, and technological training for hair, makeup, nail art, and skincare. Gain foundational knowledge in beauty routines, professionalism, and ethics. Also, learn the secrets of the K-Beauty field through a comprehensive understanding of K-Beauty techniques and brands in addition to in-depth training of total beauty principles. Our K-Beauty Design program goes beyond basic skills. Your education includes theory and skills to comprehend the industry as a whole and anticipate upcoming trends.

Through beauty practice and theoretical classes, graduates possess the skills and knowledge that allow you to grow into a total beauty industry expert with planning skills and a distinctive knowledge of the Korean Beauty industry and standards. These skills will allow you to become a true professional and allows you to develop into a beauty designer, artist, marketer, entrepreneur, or influencer.

K-Pop Arts Management Managing the Music Industry with Special Knowledge of K-Pop

Preparing students to organize and manage music organizations especially in K-pop arts, operations, facilities, and personnel.

Learning Outcomes

- . Theoretical and hands-on in-depth training of total beauty • Exclusive K-Beauty cosmetic brand knowledge • Knowledge of foreign cosmetic brands • K-Beauty Professionalism and Ethics • K-Beauty Entrepreneurship Skills

Behind the success of all K-POP artists on stage are a lot of people with different roles: potential star searching team, managing and record producing A&R, distributors, concert planners, marketers, and fan managers. What kind of skills are needed for these positions? Could you be one of them? With the growth of "Hallyu," the Korean Wave, there is a growing demand for personnel who can organize and manage music organizations, especially for those who specialize in K-Pop Arts and operations for the international market.

Our K-Pop Arts Management program gives our students an understanding of global art culture through practical learning experiences taught by professors who have a global vision of the popular arts industry. Our faculty have worked with Korean broadcast companies, like KBS and SM Entertainment, and Korean entertainment groups, like EXO and Seventeen. Our uniquely all English program prepares you with knowledge of professionally producing content for various platforms to manage in the entertainment industry. Our graduates with their specialized knowledge of the Korean Wave industry will be uniquely qualified for positions in promotion, marketing, and entertainment management/production, or look to create your own art-culture start-up.

Self Design Major Design a degree that fits your career goals

The aim of our Self Design Major is to provide a path for Woosong University students to achieve a level of competence similar to that of students in any of our regularly-offered undergraduate majors, in an academic area of their own design. This major allows you to explore and design a degree that fits your unique goals for the future.

The responsibility for design and execution of the major lies with students. In your first year, you explore all of your interests and are not bound to any specific department's requirements. This gives you the power to know exactly what interests you and what path you want to pursue. At the end of your first year, you develop and present a unique degree by selecting areas of interest to combine and create your own individualized degree. This gives you the ability to build a program that is right for your future.

Students accepted into the Self Designed Major can pursue his or her own course of study deeply, culminating in a senior presentation or seminar regarding the academic course design and achievement. Self Design proposed degrees must differ from any established major at Woosong University.

YOU CREATE THE IDEA. WE HELP MAKE AND GUIDE YOU ON THE PATH. THEN YOU MAKE IT HAPPEN.

Combine Hotel Management and Culinary Arts for a degree designed towards Hotel Culinary Management. Focus on Media Communications and K-Pop Management for a degree designed for K-Pop Media Management. If you can dream it, we will help make it happen.

Design Your Own Degree • After your first year, you determine your academic interests, choose either a BBA, BS, or BA degree module, and then select areas of interest to combine.
